

# Light Pipes

## 90° Light Pipes For Surface Mounts

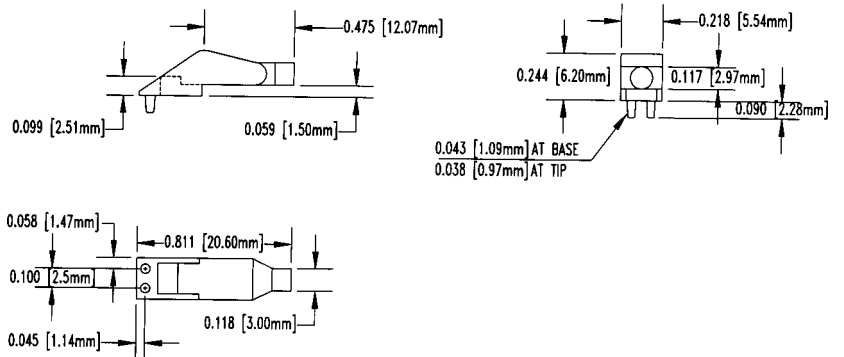

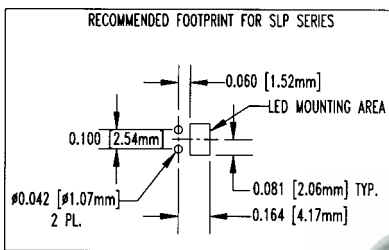

- **Wide Viewing Angles**
- **ESD Protection**
- **Use With BivarOpto SM Series LEDs**

BivarOpto light pipes are ideal for applications where an automatically placed surface mount LED requires its output redirected to a front panel. BivarOpto light pipes are engineered of 94V-0 compliant clear polycarbonate for maximum light transmission. Light pipes will also protect circuits from accidental damage from ESD by isolating the PCB from potential contact.
